TRANSPORTATION

(SEVENTH DIVISION)

RAILWAY MAIL SERVICE

INTRODUCTION

1. To prepare for an examination for clerk in the **railway mail service,** it is necessary to be thoroughly familiar with the subject of **Transportation.** This subject is not only a very important one in the examination before the Civil Service Commission, but the knowledge obtained from studying it will be of material benefit after you have entered the service, as you will be examined in it from time to time. For this reason, we have made the instruction in this subject particularly thorough so as to fit you for your work after appointment as well as for the examination. The seventh railway mail division comprises the states of Missouri, Kansas, Colorado, and New Mexico.

2. Outline of Work.—To acquire a thorough knowledge of Transportation, you will be required to study this Instruction Paper, a map of your railway mail division, and an Official Guide of Railways.

The Instruction Paper contains a list of the railroads in your division arranged in alphabetical order. The names that are given are the names of the railroad systems and not the names of the roads comprising the system. Following the list of railroads is a complete summary of each railroad

Copyrighted by International Textbook Company. All rights reserved

mentioned, giving the beginning and terminus of its main line and all its branch lines. This summary also contains a complete list of the junction points between these terminal points and the connecting railroads at each junction point and at the terminals. The stations after which are printed the words "End of line" or "End of branch" are terminal points of main lines or branch lines; if they are junction points, the name of another railroad is printed above the words "End of line" or "End of branch."

The map that you are to use contains all terminal points, junction points, and the railroads entering them. The relative importance of each station, with regard to population, is distinguished by the following characters: The first character ○, represents towns with not more than 5,000 inhabitants; the second ◉, those with 5,000 to 25,000 inhab-

○ Not over 5,000 Inhabitants ◉ Not over 25,000 Inhabitants

◎ Not over 100,000 Inhabitants ◉ Over 100,000 Inhabitants

State Capitals

itants; the third ◎, cities having between 25,000 and 100,000 inhabitants; the fourth ◉, cities of 100,000 inhabitants and over; and the last ★, the state capitals.

The Official Guide of Railways is furnished you so that you will be informed of any current changes that have taken place in the name of the railroads or the names of the operating companies since the printing of this Instruction Paper. The new name or the name of the operating company will always be found in the back part of the Guide under the heading **List of Old and New Names of Roads.** For example, the Missouri Midland will be found under this heading as being operated by the Missouri, Kansas, & Texas railroad. Current changes in the names of stations will also be found next following. Example: Vermejo, N. Mex., is now called Colfax, N. Mex. A complete alphabetical list of all railroad stations in the United States, showing the railroad or railroads entering them, is given at the end.

The Guide also contains a general railroad map of all the railroads of the United States as well as complete individual

maps of the more prominent ones, and an alphabetical list of all railroads, which gives an index to the map and the schedule of each.

3. Terms Used.—A **junction point** is the place (city, town, or station) where two or more railroads (using separate tracks) enter, meet, or cross; or it is a place (city, town, or station) from which branch lines of a system diverge. Joplin, Mo., situated on the St. Louis & San Francisco; Kansas City Southern; Missouri, Kansas, & Texas, and Missouri Pacific railroads is an example of the first kind: Burlingame, Kans., on the Atchison, Topeka, & Santa Fe, is an example of the second.

A **trunk line** is the main line of a large railroad system having numerous branch lines; for example, the Union Pacific, which has branches at Salina, Kans., and Oakley, Kans.

By the **shortest route** is meant either the shortest actual distance or the shortest time distance between two points; in this work we shall consider the shortest distance as the shortest route. The information for either definition, however, can be readily found in the Official Guide of Railways, which contains a schedule of each railroad giving the actual distance and the time distance between stations. For example, you will find from the schedule of the St. Louis & San Francisco railroad that the actual distance between St. Louis, Mo., and Monett, Mo., is 283 miles and that the time distance is 8 hours and 25 minutes.

When a railroad is leased and operated by another railroad, only the name of the operating railroad is shown on the map. Both the name of the operating railroad and the name of the leased railroad, however, are given in the Instruction Paper, as shown on page 25.

4. Care of the Map.—So that the map may always present a smooth surface, it should be mounted on a piece of heavy cardboard. This will preserve the map and prevent its being torn. Proceed in the following manner to mount the map:

Materials Required.—Good liquid glue or mucilage, a small brush, a dry cloth, a sheet of paper slightly larger than the map, and a piece of cardboard somewhat larger than the sheet of paper. First, unfold the map and lay it flat on the cardboard with the wrong side up and smooth out the creases as best you can with your thumb nail. Next, fold down over the edge of the cardboard about ½ inch of the upper and lower edges of the map; apply the glue with the brush to the folded edges only. Then, reverse the map and place over it a blank sheet of paper and smooth it from the center toward the top and bottom edges with the dry cloth, pressing down the glued edges until they are sufficiently dry to adhere to the cardboard at every point.

HOW TO STUDY

5. Order of Study.—The study of this subject should be conducted as follows: First, tracing the map; second, learning the junction points and the connecting railroads at them; and third, compiling a notebook to contain the railroad routes between prominent cities and all the junction points on these routes, and the connecting railroads at these junction points.

6. Tracing the Map.—Stretch over the map a piece of tracing paper. Tack both the map and the tracing paper to a table or a light, planed board by means of eight thumbtacks. Trace with a sharpened, soft, black pencil the boundary of your division, then the boundary lines of each state in the division. Indicate, on the tracing, the beginning and terminus of the first railroad, the Argentine Central, which appears on page 11 of this Instruction Paper; for example, indicate the location of Silver Plume, Colo., and Mt. McClellan, Colo. Next, with a black lead pencil, draw the line of this railroad between the terminal points indicated on the tracing. Next, indicate the location of the beginning and terminus of the second railroad, the Arizona & New Mexico, which appears on page 11. Mark the location

of each junction point, printed on page 11 between these terminal points, with a character similar to the one on the map. Memorize the connecting railroads at each junction point as you indicate them on the tracing. Mark the names of these junction points in the same position that they appear on the map. Next, draw the line of this railroad between the junction points indicated on the tracing. Again, indicate the beginning and terminus of the main line of the Atchison, Topeka, & Santa Fe railroad between Fort Madison, Iowa, and Denver, Colo., and the junction points between them, and, as before, memorize the connecting railroads at each point. Draw on the tracing, with a different colored pencil, the line of this railroad between the junction points indicated. Mark on the tracing, the beginning and terminus of the first branch of the Atchison, Topeka, & Santa Fe that you will find on page 15; for example, La Junta, Colo., and El Paso, Tex. Then, indicate on the tracing, with a character similar to the one on the map, the location of each junction point between these points and mark the names in the same position they appear on the map. As before, memorize the connecting railroads at each junction point and terminal, then draw with the same colored pencil that you used for marking the main line, the line of this branch between the junction points indicated. Continue this operation until you have traced the entire system. Indicate the next railroad and continue in this manner until you have drawn on the tracing all the railroads comprising your division; the result will be that you will have produced a facsimile of the map that you are studying. Six pencils of different color will be sufficient for this work, since a solid line of one color can represent one railroad and a dotted line of the same color can represent another railroad.* It is not necessary to use different colored pencils on such small railroads as the Arkansas & Louisiana, Arizona & New Mexico, Arkansas Central, and Book Cliff railroads, as black will do as well. Wherever the name of a railroad is marked

*The tracing paper, thumbtacks, and colored pencils are mailed, under separate cover, at the same time as this Instruction Paper.

on the map, mark it with black pencil on the tracing. This exercise will be of great assistance to you and will impress on your mind the general direction of each railroad system and its branches as well as the junction points and connecting railroads at them; in fact, it should give you a mental picture of the map of your entire division.

7. Junction Points and Connecting Railroads.—Begin at page 11 of this Instruction Paper, and study the beginning points, junction points, and terminals of each railroad and each of its branches, also of the connecting railroads at each of these points; study these junction points and connecting railroads thoroughly. Do not leave one railroad until you can name, without referring to the book, the beginning and terminus of its main line and its branches, every junction point on it, and the connecting railroads at each of the junction points. After you have accomplished this with the first road, take up the second and then the third, and continue thus until you have finished the entire list. You should conduct this study slowly and systematically and, from time to time, should review from the beginning, so that what you have studied will remain fresh in your memory.

8. Compiling the Notebook.—The object of compiling a notebook is to make you familiar with the manner of answering questions on Transportation. You should select two important cities of your division and find them on your map. Next follow on the map the railroad or railroads forming the shortest route between them and write the names of the railroads in your notebook. If you are in doubt as to which railroads form the shortest route between the points selected, consult your Official Guide of Railways, and determine the mileage as explained in the following example:

Example: The map shows six ways of connecting, by railroad, Kansas City, Mo., and St. Louis, Mo.; namely, by the Wabash; Chicago, Burlington, & Quincy; Chicago & Alton; Missouri Pacific; Chicago, Rock Island, & Pacific; and Missouri, Kansas, & Texas. The several schedules of these railroads give the distance between Kansas City, Mo.,

and St. Louis, Mo., as follows: Wabash, 277 miles; Chicago, Burlington, & Quincy, 279 miles; Chicago & Alton, 280 miles; Missouri Pacific, 283 miles; Chicago, Rock Island, & Pacific, 299 miles; and the Missouri, Kansas, & Texas, 373 miles. By comparing these results, it is readily seen that the first route is the shortest and should be the one selected.

Having written the names of the railroads forming the shortest route between the two points selected, write in your notebook, one under the other, the junction points as they appear on the map. On the same line with each junction point, write the name of the connecting railroad or railroads at that point. Continue in this manner until you have connected, by railroad, all the prominent cities, one with the other. By this method, you will have the entire map in the form of question and answer.

You should procure a notebook that you can conveniently carry in your pocket, size about 4½ inches by 7 inches. This notebook should be carried about with you and studied at all times when opportunity offers. Be careful in doing this work and consult the map and Instruction Paper, in order that you may make no mistakes, and finally, after completing this work, answer the questions at the end of this Paper without any assistance, and send the answers to us for correction.

FORM OF NOTEBOOK

Waverly, Colo., to Trinidad, Colo.

Colorado & Southern from Waverly, Colo., to Trinidad, Colo.

9. Answering Examination Questions.—When answering questions in the subject of Transportation, write in full the names of all railroads, and give the name of the state in which each junction point is located, as many states have junction points of the same name. If more than one railroad is required to connect two cities given in a question, always give the point of connection between the two railroads.

Example.—Name the railroad or railroads forming the shortest route between Bowling Green, Mo., and Eldon, Mo.

Answer.—The Chicago & Alton from Bowling Green, Mo., to Jefferson City, Mo., and the Missouri Pacific from Jefferson City, Mo., to Eldon, Mo.

	Chicago, Rock Island, & Pacific
Trimble, Mo.	St. Joseph & Grand Island

Junction Points	Connecting Railroads
Kansas City, Mo.	Atchison, Topeka, & Santa Fe
	Chicago & Alton
	Chicago, Burlington, & Quincy
	Chicago Great Western
	Chicago, Milwaukee, & St. Paul
	Chicago, Rock Island, & Pacific
	Kansas City, Mexico, & Orient
	Kansas City Southern
	Missouri, Kansas, & Texas
	Missouri Pacific
	St. Joseph & Grand Island
	St. Louis & San Francisco
	Union Pacific
	Wabash
	End of line

RIO GRANDE & PAGOSA SPRINGS

Lumberton, N. Mex., to Flaugh, Colo.

Junction Points	Connecting Railroads
Lumberton, N. Mex.	Denver & Rio Grande
Flaugh, Colo.	End of line

RIO GRANDE SOUTHERN

Ridgway, Colo., to Durango, Colo.

Junction Points	Connecting Railroads
Ridgway, Colo.	Denver & Rio Grande
Placerville, Colo.	Denver & Rio Grande
Vance Jc., Colo.	Denver & Rio Grande
	Rio Grande Southern
Dolores, Colo.	Denver & Rio Grande
Durango, Colo.	Denver & Rio Grande
	End of line

Vance Jc., Colo., to Pandora, Colo.

Vance Jc., Colo.	Denver & Rio Grande
	Rio Grande Southern
Pandora, Colo.	End of branch

RIO GRANDE WESTERN

Grand Jc., Colo., to Cisco, Utah

Junction Points	Connecting Railroads
Grand Jc., Colo.	Book Cliff
	Colorado Midland
	Denver & Rio Grande
	Rio Grande Junction

Junction Points	Connecting Railroads
Mack, Colo.	Denver & Rio Grande
	Uintah
Cisco, Utah	Denver & Rio Grande
	Rio Grande Western

ROCKPORT, LANGDON, & NORTHERN

Langdon, Mo., to Rockport, Mo.

Junction Points	Connecting Railroads
Langdon, Mo.	Chicago, Burlington, & Quincy
Rockport, Mo.	End of line

SAGINAW & OUACHITA RIVER

Saginaw, Ark., to Bismarck, Ark.

Junction Points	Connecting Railroads
Saginaw, Ark.	St. Louis, Iron Mountain, & Southern
Bismarck, Ark.	End of line

ST. JOSEPH & GRAND ISLAND

Kansas City, Mo., to Grand Island, Neb.

Junction Points		Connecting Railroads
Via Quincy, Omaha, & Kansas City	Kansas City, Mo.	Atchison, Topeka, & Santa Fe
		Chicago & Alton
		Chicago, Burlington, & Quincy
		Chicago Great Western

TRANSPORTATION

(EIGHTH DIVISION)

RAILWAY MAIL SERVICE

INTRODUCTION

1. To prepare for an examination for clerk in the **railway mail service,** it is necessary to be thoroughly familiar with the subject of **Transportation.** This subject is not only a very important one in the examination before the Civil Service Commission, but the knowledge obtained from studying it will be of material benefit after you have entered the service, as you will be examined in it from time to time. For this reason, we have made the instruction in this subject particularly thorough, so as to fit you for your work after appointment as well as for the examination. The eighth railway mail division comprises the states of California, Nevada, Oregon, Alaska, Arizona, Idaho, Utah, and Washington.

2. Outline of Work.—To acquire a thorough knowledge of Transportation, you will be required to study this Instruction Paper, a map of your railway mail division, and the Official Guide of Railways.

The Instruction Paper contains a list of the railroads in your division arranged in alphabetical order. The names that are given are the names of the railroad systems and not the names of the roads comprising the system. Following the list of railroads is a complete summary of each railroad mentioned, giving the beginning and terminus of its main

Copyrighted by International Textbook Company. All rights reserved

line and all its branch lines. This summary also contains a complete list of the junction points between these terminal points and the connecting railroads at each junction point and at the terminals. The stations after which are printed the words "End of line" or "End of branch" are terminal points of main lines or branch lines; if they are junction points, the name of another railroad is printed above the words "End of line" or "End of branch."

The map that you are to use contains all terminal points, junction points, and the railroads entering them. The relative importance of each station, with regard to population, is distinguished by the following characters: The first character ○ represents towns with not more than 5,000 inhabitants; the second ◉, those with 5,000 to 25,000 inhab-

itants; the third ◎, cities having between 25,000 and 100,000 inhabitants; the fourth ◉, cities of 100,000 inhabitants and over; and the last ★, the state capitals.

The Official Guide of Railways is furnished you so that you will be informed of any current changes that have taken place in the name of the railroads or the names of the operating companies since the printing of this Instruction Paper. The new name or the name of the operating company will always be found in the back part of the Guide under the heading **List of Old and New Names of Roads.** For example, the San Diego, Pacific Beach, & Jolla will be found under this heading as being operated by the Los Angeles & San Diego Beach railroad. Current changes in the names of stations will also be found next following. For example, Empire, Cal., is now called Stratton, Cal. A complete alphabetical list of all railroad stations in the United States, showing the railroad or railroads entering them, is given at the end.

The Guide also contains a general railroad map of all the railroads of the United States as well as complete individual

maps of the more prominent ones, and an alphabetical list of all railroads, which gives an index to the map and the schedule of each.

3. Terms Used.—A **junction point** is the place (city, town, or station) where two or more railroads (using separate tracks) enter, meet, or cross; or it is a place (city, town, or station) from which branch lines of a system diverge. Ogden, Utah, situated on the Oregon Short Line, Rio Grande Western, Southern Pacific, and Union Pacific, is an example of the first kind; and Ash Fork, Ariz., on the Atchison, Topeka, & Santa Fe, is an example of the second kind.

A **trunk line** is the main line of a large railroad system having numerous branch lines; for example, the Southern Pacific, which has branches at Reno, Nev., and Bakersfield, Cal.

By the **shortest route** is meant either the shortest actual distance or the shortest time distance between two points; in this work we shall consider the shortest distance as the shortest route. The information for either definition, however, can be readily found in the Official Guide of Railways, which contains a schedule of each railroad giving the actual distance and the time distance between stations. For example, you will find from the schedule of the Rio Grande Western railroad that the actual distance between Ogden, Utah, and Provo, Utah, is 81 miles, and that the time distance is 2 hours and 25 minutes.

When a railroad is leased and operated by another railroad, the name of the operating company and the name of the leased railroad are both shown on the map, as well as in the Instruction Paper.

4. Care of the Map.—So that the map may always present a smooth surface, it should be mounted on a piece of heavy cardboard. This will preserve the map and prevent its being torn. Proceed in the following manner to mount the map:

Materials Required.—Good liquid glue or mucilage, a small brush, a dry cloth, a sheet of paper slightly larger than the map, and a piece of cardboard somewhat larger than the sheet of paper. First, unfold the map and lay it flat on the cardboard with the wrong side up and smooth out the creases as best you can with your thumb nail. Next, fold down over the edge of the cardboard about ½ inch of the upper and lower edges of the map; apply the glue with the brush to the folded edges only. Then reverse the map and place over it a blank sheet of paper and smooth it from the center toward the top and bottom edges with a dry cloth, pressing down the glued edges until they are sufficiently dry to adhere to the cardboard at every point.

HOW TO STUDY

5. Order of Study.—The study of this subject should be conducted as follows: First, tracing the map; second, learning the junction points and the connecting railroads at them; and third, compiling a notebook to contain the railroad routes between prominent cities and all the junction points on these routes, and the connecting railroads at these junction points.

6. Tracing the Map.—Stretch over the map a piece of tracing paper with the dull side up. Tack both the map and the tracing paper to a table or a light, planed board by means of eight thumbtacks. Trace with a sharpened, soft, black pencil the boundary of your division, then the boundary lines of each state in the division. Indicate, on the tracing, the beginning and terminus of the first railroad, the Arcata & Mad River, which appears on page 11 of this Instruction Paper; for example, indicate the location of Arcata, Cal., and Korbel, Cal. Memorize the connecting railroads at each terminal point as you indicate them on the tracing. Mark the names of these terminal points in the same position that they appear on the map, and then draw the line of this

railroad between the terminal points so indicated. Next, mark on the tracing the beginning and terminus of the second railroad, the Arizona & New Mexico. As before, with a black lead pencil, draw the line of this railroad between these terminal points. Then, with the black lead pencil, mark, with a character similar to the one on the map, the location of the junction points Lordsburg, N. Mex., and Guthrie, Ariz., between these terminal points. Mark the names of these junction points and the terminal points in the same position they appear on the map and memorize the names of the connecting railroads at the junction and terminal points as you indicate them. Then, draw the line of this railroad between the points indicated on the tracing. Proceed in the same manner with the Arizona Southern. Next, indicate on the tracing the beginning and terminus of the main line of the Astoria & Columbia River railroad, then the junction points between these terminal points. Mark the names of these junction and terminal points in the same position that they appear on the map. Next, draw, with a different-colored pencil, the line of this railroad between the junction points indicated on the tracing. In the same manner, indicate on the tracing the beginning and terminus of the branch of the Astoria & Columbia River railroad; for example, Warrenton, Ore., and Fort Stevens, Ore. As before, memorize the connecting railroads at these terminal points, and then draw with the same colored pencil that you used for marking the main line, the line of this branch indicated by the terminal points. Next, indicate, in the manner just described, the beginning and terminus of the main line of the Atchison, Topeka, & Santa Fe railroad and the junction points between them; and with a third colored pencil draw the line of this railroad between the points so located. Continue in this manner until you have drawn, on the tracing, all the railroads comprising your division; the result will be that you will have produced a facsimile of the map that you are studying. Six pencils of different color will be sufficient for this work, since a solid line of one color can represent one railroad and a dotted line of the same color can represent another

railroad*. It is not necessary to use different-colored pencils on such small railroads as the Arcata & Mad River and the Arizona & New Mexico, as black will do as well. Wherever the name of a railroad is marked on the map, mark it with black pencil on the tracing. This exercise will be of great assistance to you and will impress on your mind the general direction of each railroad system and its branches as well as the junction points and connecting railroads at them; in fact, it should give you a mental picture of the map of your entire division.

7. Junction Points and Connecting Railroads.—Begin at page 11 of this Instruction Paper, and study the beginning points, junction points, and terminals of each railroad and each of its branches, also of the connecting railroads at each of these points; study these junction points and connecting railroads thoroughly. Do not leave one railroad until you can name, without referring to the book, the beginning and terminus of its main line and its branches, every junction point on it, and the connecting railroads at each of the junction points. After you have accomplished this with the first road, take up the second and then the third, and continue thus until you have finished the entire list. You should conduct this study slowly and systematically, and, from time to time, should review from the beginning, so that what you have studied will remain fresh in your memory.

8. Compiling the Notebook.—The object of compiling a notebook is to make you familiar with the manner of answering questions on Transportation. You should select two important cities of your division and find them on your map. Next, follow on the map the railroad or railroads forming the shortest route between them and write the names of the railroads in your notebook. If you are in doubt as to which railroads form the shortest route between the

*The tracing linen, thumbtacks, and colored pencils will be sent you at the same time that you receive this Instruction Paper.

points selected, consult your Official Guide of Railways, and determine the mileage as explained in the following example:

Example: The map shows two ways of connecting, by railroad, San Francisco, Cal., and Los Angeles, Cal.; one way by the Southern Pacific, the other by the Atchison, Topeka, & Santa Fe. In the Official Guide of Railways the schedule of the Southern Pacific railroad gives the distance between San Francisco, Cal., and Los Angeles, Cal., as 475 miles. The schedule of the Atchison, Topeka, & Santa Fe railroad gives the distance as 593 miles. By comparing these results, it is readily seen that the first route is the shorter and should be the one selected.

Having written the names of the railroads forming the shortest route between the two points selected, write in your notebook, one under the other, the junction points as they appear on the map. On the same line with each junction point, write the name of the connecting railroad or railroads at that point. Continue in this manner until you have connected, by railroad, all the prominent cities, one with the other. By this method, you will have the entire map in the form of question and answer.

You should procure a notebook that you can conveniently carry in your pocket, size about 4½ inches by 7 inches. This notebook should be carried about with you and studied at all times when opportunity offers. Be careful in doing this work to consult the map and Instruction Paper, in order that you may make no mistakes, and finally, after completing this work, answer the questions at the end of this Paper without any assistance, and send the answers to us for correction.

9. Answering Examination Questions.—When answering questions on the subject of Transportation, write, in full, the names of all railroads, and give the name of the state in which each junction point is located, as many states have junction points of the same name. If more than one railroad is required to connect two cities given in a question, always give the point of connection between the two railroads.

Example.—Name the railroad or railroads forming the shortest route between Spokane, Wash., and Stockton, Cal.

Answer. The Oregon Railroad & Navigation Co. from Spokane, Wash., to Portland, Ore., and the Southern Pacific from Portland, Ore., to Stockton, Cal.

Temecula, Cal	End of branch

Riverbank, Cal., to Oakdale, Cal.

Riverbank, Cal	Atchison, Topeka, & Santa Fe
Oakdale, Cal	Sierra Southern Pacific

Elsinore Jc., Cal., to Alberhil, Cal.

Elsinore Jc., Cal	Atchison, Topeka, & Santa Fe
Alberhil, Cal	End of branch

Goffs, Cal., to Ivanpah, Cal.

Goffs, Cal	Atchison, Topeka, & Santa Fe
Barnwell, Cal	Atchison, Topeka, & Santa Fe
Leastalk, Cal	San Pedro, Los Angeles, & Salt Lake
Ivanpah, Cal	End of branch

Barnwell, Cal., to Searchlight, Nev.

Barnwell, Cal	Atchison, Topeka, & Santa Fe
Searchlight, Nev	End of branch

McConnico, Ariz., to Chloride, Ariz.
(Arizona & Utah)

McConnico, Ariz	Atchison, Topeka, & Santa Fe
Chloride, Ariz	End of branch

Ash Fork, Ariz., to Phoenix, Ariz.
(Santa Fe, Prescott, & Phoenix)

Ash Fork, Ariz	Atchison, Topeka, & Santa Fe
Jerome Jc., Ariz	United Verde & Pacific
P. & E. Jc., Ariz	Santa Fe, Prescott, & Phoenix
Congress Jc., Ariz	Congress Consolidated Mines
Wickenburg, Ariz	Santa Fe, Prescott, & Phoenix
Phoenix, Ariz	Maricopa & Phoenix

P. & E. Jc., Ariz., to Crown King, Ariz.

Junction Points	Connecting Railroads
P. & E. Jc., Ariz.	Santa Fe, Prescott, & Phoenix
Poland Jc., Ariz.	Santa Fe, Prescott, & Phoenix
Crown King, Ariz.	End of branch

Poland Jc., Ariz., to Poland, Ariz.

Poland Jc., Ariz.	Santa Fe, Prescott, & Phoenix
Poland, Ariz.	End of branch

Wickenburg, Ariz., to Parker, Ariz.
(Santa Fe, Prescott, & Phoenix)

Wickenburg, Ariz.	Santa Fe, Prescott, & Phoenix
Parker, Ariz.	End of branch

Williams, Ariz., to Grand Canyon, Ariz.
(Grand Canyon)

Williams, Ariz.	Atchison, Topeka, & Santa Fe
Grand Canyon, Ariz.	End of branch

BELLINGHAM BAY & BRITISH COLUMBIA

Bellingham, Wash., to Glacier, Wash.

Junction Points	Connecting Railroads
Bellingham, Wash.	Great Northern
	Northern Pacific
Hampton, Wash.	Bellingham Bay & British Columbia
Sumas, Wash.	Canadian Pacific
	Northern Pacific
Glacier, Wash.	End of line

Hampton, Wash., to Lynden, Wash.

Hampton, Wash.	Bellingham Bay & British Columbia
Lynden, Wash.	End of branch

BOCA & LOYALTON

Boca, Cal., to Beckwith, Cal.

Junction Points	Connecting Railroads
Boca, Cal.	Southern Pacific
Beckwith, Cal.	Nevada, California, & Oregon
	Western Pacific
	End of line

BUTTE COUNTY

Chico, Cal., to Stirling City, Cal.

Junction Points	Connecting Railroads
Chico, Cal.	Southern Pacific
Stirling City, Cal.	End of branch

CANANEA, YAQUI RIVER, & PACIFIC

Naco, Ariz., to Cananea, Mex.

Junction Points	Connecting Railroads
Naco, Ariz.	El Paso & Southwestern
Cananea, Mex.	End of line

CENTRAL ARIZONA

Flagstaff, Ariz., to Mormon Dairy, Ariz.

Junction Points	Connecting Railroads
Flagstaff, Ariz.	Atchison, Topeka, & Santa Fe
Mormon Dairy, Ariz.	End of line

COLUMBIA & NEHALEM VALLEY

Columbia, Ore., to Pittsburg, Ore.

Junction Points	Connecting Railroads
Columbia, Ore.	Astoria & Columbia River Northern Pacific
Pittsburg, Ore.	End of line

COLUMBIA & PUGET SOUND

Seattle, Wash., to Franklin, Wash.

Junction Points	Connecting Railroads
Seattle, Wash.	Great Northern Northern Pacific
Black River, Wash.	Northern Pacific
Renton, Wash.	Columbia & Puget Sound Northern Pacific
Maple Valley, Wash.	Columbia & Puget Sound
Franklin, Wash.	End of line

Renton, Wash., to Coal Creek, Wash.

Junction Points	Connecting Railroads
Renton, Wash.	Columbia & Puget Sound Northern Pacific
Coal Creek, Wash.	End of branch

Maple Valley, Wash., to Taylor, Wash.

Maple Valley, Wash.	Columbia & Puget Sound
Taylor, Wash.	End of branch

COLUSA & LAKE

Colusa, Cal., to Sites, Cal.

Junction Points	Connecting Railroads
Colusa, Cal.	End of line
Colusa Jc., Cal.	Southern Pacific
Sites, Cal.	End of line

CONGRESS CONSOLIDATED MINES

Congress Jc., Ariz., to Congress, Ariz.

Congress Jc., Ariz.	Santa Fe, Prescott, & Phoenix
Congress, Ariz.	End of line

CORVALLIS & EASTERN

Yaquina, Ore., to Detroit, Ore.

Junction Points	Connecting Railroads
Yaquina, Ore.	End of branch
Corvallis, Ore.	Southern Pacific
Albany, Ore.	Southern Pacific
Shelburn, Ore.	Southern Pacific
Detroit, Ore.	End of line

DIAMOND & CALDOR

Diamond Springs, Cal., to Caldor, Cal.

Junction Points	Connecting Railroads
Diamond Springs, Cal.	Southern Pacific
Caldor, Cal.	End of line

EL PASO & SOUTHWESTERN

Benson, Ariz., to El Paso, Tex.

Junction Points	Connecting Railroads
Benson, Ariz.	Phoenix & Eastern
	Southern Pacific
Fairbank, Ariz.	El Paso & Southwestern
	Southern Pacific
Naco, Ariz.	Cananea, Yaqui River, & Pacific
Osborn, Ariz.	El Paso & Southwestern
Douglas, Ariz.	Nacozari
Hachita, N. Mex.	Arizona & New Mexico
Hermanas, N. Mex.	El Paso & Southwestern
El Paso, Tex.	Atchison, Topeka, & Santa Fe
	El Paso & Southwestern
	Mexican Central
	Southern Pacific
	Texas & Pacific

Fairbank, Ariz., to Tombstone, Ariz.

Fairbank, Ariz.	El Paso & Southwestern
	Southern Pacific
Tombstone, Ariz.	End of branch

Osborn, Ariz., to Bisbee, Ariz.

Osborn, Ariz.	El Paso & Southwestern
Bisbee, Ariz.	End of branch

EUREKA & PALISADE

Palisade, Nev., to Eureka, Nev.

Junction Points	Connecting Railroads
Palisade, Nev.	Southern Pacific
	Western Pacific
Eureka, Nev.	End of line

GREAT NORTHERN

Rexford, Mont., to Seattle, Wash.

Junction Points	Connecting Railroads
Rexford, Mont.	Great Northern
Bonner's Ferry, Idaho	Kootenai Valley
	Spokane International
Sand Point, Idaho	Northern Pacific
	Spokane International
Newport, Wash.	Idaho & Washington Northern
Colbert, Wash.	Spokane Falls & Northern

Junction Points	Connecting Railroads
Spokane, Wash.	Coeur D'Alene & Spokane
	Northern Pacific
	Oregon Railroad & Navigation Co
	Spokane & Inland Empire
	Spokane International
Adrian, Wash.	Northern Pacific
Snohomish, Wash.	Northern Pacific
Everett, Wash.	Great Northern
	Northern Pacific
Interbay, Wash.	Northern Pacific
Seattle, Wash.	Columbia & Puget Sound
	Northern Pacific

Rexford, Mont., to Fernie, B. C.

Rexford, Mont.	Great Northern
Fernie, B. C.	Canadian Pacific
	End of branch

Bonner's Ferry, Idaho, to Kuskonook, B. C.
(Kootenai Valley)

Bonner's Ferry, Idaho	Great Northern
	Spokane International
Creston Jc., B. C.	Canadian Pacific
Sirdar Jc., B. C.	Canadian Pacific
Kuskonook, B. C.	Canadian Pacific
	End of branch

Spokane, Wash., to Nelson, B. C.
(Spokane Falls & Northern)

Spokane, Wash.	Coeur D'Alene & Spokane
	Idaho & Washington Northern
	Northern Pacific
	Oregon Railroad and Navigation Co.
	Spokane & Inland Empire
	Spokane International
Colbert, Wash.	Spokane Falls & Northern
Marcus, Wash.	Spokane Falls & Northern
Northport, Wash.	Spokane Falls & Northern
Nelson, B. C.	Canadian Pacific
	Nelson & Ft. Sheppard
	End of branch

Northport, Wash., to Rossland, B. C.
(Spokane Falls & Northern)

Northport, Wash.	Spokane Falls & Northern
Rossland, B. C.	Canadian Pacific
	End of branch

Marcus, Wash., to Republic, Wash.

	Junction Points	Connecting Railroads
Via V., V. & E. Ry. & Nav. Co.	Marcus, Wash.	Spokane Falls & Northern
	Grand Forks, B. C.	Canadian Pacific
		Great Northern
		Spokane & British Columbia
	Carson, B. C.	Spokane & British Columbia
	Curlew, Wash.	Spokane & British Columbia
		Spokane Falls & Northern
	Summit, Wash.	Spokane & British Columbia
	Republic, Wash.	Spokane & British Columbia
		End of branch

Seattle, Wash., to Vancouver, B. C.

	Seattle, Wash.	Columbia & Puget Sound
		Northern Pacific
	Interbay, Wash.	Northern Pacific
	Everett, Wash.	Great Northern
		Northern Pacific
	Burlington, Wash.	Great Northern
	Belleville, Wash.	Great Northern
	Bellingham, Wash.	Bellingham Bay & British Columbia
		Northern Pacific
	Cloverdale, B. C.	Great Northern
Via V., W. & Y.	New Westminster, B. C.	Canadian Pacific
	Vancouver, B. C.	Canadian Pacific
		End of branch

Grand Forks, B. C., to Vancouver, B. C.

	Grand Forks, B. C.	Canadian Pacific
		Great Northern
		Spokane & British Columbia
	Curlew, Wash.	Spokane & British Columbia
		Spokane Falls & Northern
	Midway, B. C.	Canadian Pacific
Building	Keremeos, B. C.	End of track
	Cloverdale, B. C.	Great Northern
	New Westminster, B. C.	Canadian Pacific
		Vancouver, Westminster, & Yukon
	Vancouver, B. C.	Canadian Pacific
		End of branch

Cloverdale, B. C., to Guichon, B. C.

Cloverdale, B. C.	Great Northern
Guichon, B. C.	End of branch

Anacortes, Wash., to Rockport, Wash.

Anacortes, Wash.	End of branch
Burlington, Wash.	Great Northern
Sedro Woolley, Wash.	Northern Pacific

Junction Points	Connecting Railroads
Cokedale Jc., Wash.	Great Northern
Rockport, Wash.	End of branch

Cokedale Jc., Wash., to Cokedale, Wash.

Cokedale Jc., Wash.	Great Northern
Cokedale, Wash.	End of branch

Belleville, Wash., to Samish, Wash.

Belleville, Wash.	Great Northern
Samish, Wash.	End of branch

GREAT SOUTHERN

The Dalles, Ore., to Dufur, Ore.

Junction Points	Connecting Railroads
The Dalles, Ore.	Oregon Railroad & Navigation Co.
Dufur, Ore.	End of branch

HOLTON INTERURBAN

El Centro, Cal., to Holtville, Cal.

Junction Points	Connecting Railroads
El Centro, Cal.	Southern Pacific
Holtville, Cal.	End of line

IDAHO & WASHINGTON NORTHERN

Spokane, Wash., to Newport, Wash.

	Junction Points	Connecting Railroads
Via S. & E. I.	Spokane, Wash.	Coeur D'Alene & Spokane
		Northern Pacific
		Oregon Railroad & Navigation Co.
		Spokane & Inland Empire
		Spokane International
	McGuires, Idaho	Spokane & Inland Empire
	Coleman, Idaho	Idaho & Washington Northern
	Newport, Wash.	Great Northern

Coleman, Idaho, to Clagston Jc., Idaho

Coleman, Idaho	Idaho & Washington Northern
Clagston Jc., Idaho	Spokane International
	End of branch

IDAHO NORTHERN

Murphy, Idaho, to Emmett, Idaho

Junction Points		Connecting Railroads
Via Boise, Nampa, & Owyhee	Murphy, Idaho	End of line
	Nampa, Idaho	Oregon Short Line
Emmett, Idaho		End of line

ILWACO

Ilwaco, Wash., to Nahcotta, Wash.

Junction Points	Connecting Railroads
Ilwaco, Wash.	Connects with steamer lines
Nahcotta, Wash.	End of line

IONE & EASTERN

Ione, Cal., to Oneida, Cal.

Junction Points	Connecting Railroads
Ione, Cal.	Southern Pacific
Oneida, Cal.	End of line

IRON MOUNTAIN

Keswick, Cal., to Iron Mountain, Cal.

Junction Points	Connecting Railroads
Keswick, Cal.	Southern Pacific
Iron Mountain, Cal.	End of line

KLAMATH LAKE

Thrall, Cal., to Pokegama, Ore.

Junction Points	Connecting Railroads
Thrall, Cal.	Southern Pacific
Pokegama, Ore.	End of line

INDEPENDENCE & MONMOUTH

Independence, Ore., to Airlie, Ore.

Independence, Ore.	Southern Pacific
Monmouth, Ore.	Southern Pacific

Junction Points	Connecting Railroads
Airlie, Ore.	Southern Pacific
	End of line

Monmouth, Ore., to Dallas, Ore.

Monmouth, Ore.	Southern Pacific
Dallas, Ore.	Salem, Falls City, & Western
	Southern Pacific
	End of branch

LAKE TAHOE RY. & TRANSPORTATION CO.

Truckee, Cal., to Tahoe, Cal.

Junction Points	Connecting Railroads
Truckee, Cal.	Southern Pacific
Tahoe, Cal.	End of line

LAS VEGAS & TONOPAH

Las Vegas, Nev., to Goldfield, Nev.

Junction Points	Connecting Railroads
Las Vegas, Nev.	San Pedro, Los Angeles, & Salt Lake
Gold Center, Nev.	Bullfrog Goldfield
	Tonopah & Tidewater
Beatty, Nev.	Bullfrog Goldfield
	Tonopah & Tidewater
Rhyolite, Nev.	Bullfrog Goldfield
	Tonopah & Tidewater
Goldfield, Nev.	Bullfrog Goldfield
	Tonopah & Goldfield
	End of line

LOS ANGELES & SAN DIEGO BEACH

San Diego, Cal., to La Jolla, Cal.

Junction Points	Connecting Railroads
San Diego, Cal.	Atchison, Topeka, & Santa Fe
	San Diego Southern
	San Diego, Cuyamaca, & Eastern
La Jolla, Cal.	End of line

LUDLOW & SOUTHERN

Ludlow, Cal., to Camp Rochester, Cal.

Junction Points	Connecting Railroads
Ludlow, Cal.	Atchison, Topeka, & Santa Fe
	Tonopah & Tidewater
Camp Rochester, Cal.	End of line

McCLOUD RIVER

Sisson, Cal., to McGavic, Cal.

Junction Points	Connecting Railroads
Sisson, Cal.	Southern Pacific
McGavic, Cal.	End of line

MORENCI SOUTHERN

Guthrie, Ariz., to Morenci, Ariz.

Junction Points	Connecting Railroads
Guthrie, Ariz.	Arizona & New Mexico
Morenci, Ariz.	End of line

MOUNT HOOD

Hood River, Ore., to Dee, Ore.

Junction Points	Connecting Railroads
Hood River, Ore.	Oregon Railroad & Navigation Co.
Dee, Ore.	End of line

NACOZARI

Douglas, Ariz., to Nacozari, Ariz.

Junction Points	Connecting Railroads
Douglas, Ariz.	El Paso & Southwestern
Nacozari, Ariz.	End of line

NEVADA, CALIFORNIA, & OREGON

Reno, Nev., to Lakeview, Ore.

Junction Points	Connecting Railroads
Reno, Nev.	Southern Pacific
	Virginia & Truckee
Plumas Jc., Cal.	Nevada, California, & Oregon
Madeline, Cal.	End of track
Lakeview, Ore.	End of line

Plumas Jc., Cal., to Mohawk, Cal.
(Sierra Valley)

Junction Points	Connecting Railroads
Plumas Jc., Cal.	Nevada, California, & Oregon
Chilcoot, Cal.	Western Pacific
Beckwith, Cal.	Boca & Loyalton
	Western Pacific
Mohawk, Cal.	End of branch

NEVADA CENTRAL

Battle Mountain, Nev., to Austin, Nev.

Junction Points	Connecting Railroads
Battle Mountain, Nev.	Southern Pacific
Austin, Nev.	End of line

NEVADA COUNTY NARROW GAUGE

Colfax, Cal., to Nevada City, Cal.

Junction Points	Connecting Railroads
Colfax, Cal.	Southern Pacific
Nevada City, Cal.	End of line

NEVADA NORTHERN

Cobre, Nev., to Ely, Nev.

Junction Points	Connecting Railroads
Cobre, Nev.	Southern Pacific
Steptoe, Nev.	Western Pacific
McGill Jc., Nev.	Nevada Northern
Ely, Nev.	Tonopah & Goldfield
	End of line

McGill Jc., Nev., to McGill, Nev.

McGill Jc., Nev.	Nevada Northern
McGill, Nev.	End of branch

NORTHERN PACIFIC

Helena, Mont., to Portland, Ore.

Junction Points	Connecting Railroads
Helena, Mont.	Great Northern
	Northern Pacific
Garrison, Mont.	Northern Pacific
Drummond, Mont.	Northern Pacific
Missoula, Mont.	Northern Pacific

Junction Points	Connecting Railroads
De Smet, Idaho	Northern Pacific
Sand Point, Idaho	Great Northern
	Spokane International
Hauser Jc., Idaho	Northern Pacific
Spokane, Wash.	Coeur D'Alene & Spokane
	Great Northern
	Idaho & Washington Northern

	End of branch

Walla Walla, Wash., to Tracy, Wash.

(Washington & Columbia River)

Walla Walla, Wash.	Oregon Railroad & Navigation Co.
	Washington & Columbia River
Tracy, Wash.	End of branch

Sunnyside Jc., Wash., to Sunnyside, Wash.

Sunnyside Jc., Wash.	Northern Pacific
Sunnyside, Wash.	End of branch

Centralia, Wash., to South Bend, Wash.

Centralia, Wash.	Northern Pacific
Chehalis, Wash.	Northern Pacific
South Bend, Wash.	End of branch

Kalama, Wash., to Vancouver, Wash.

Junction Points	Connecting Railroads
Kalama, Wash.	Northern Pacific
Vancouver Jc., Wash.	Northern Pacific
Vancouver, Wash.	Spokane, Portland, & Seattle
	End of branch

Vancouver Jc., Wash., to Yacolt, Wash.

Vancouver Jc., Wash.	Northern Pacific
Yacolt, Wash.	End of branch

Port Townsend, Wash., to Quilcene, Wash.
(Port Townsend Southern)

Port Townsend, Wash.	End of line
Quilcene, Wash.	End of line

Olympia, Wash., to Tenino, Wash.
(Port Townsend Southern)

Olympia, Wash.	Northern Pacific
Tenino, Wash.	Northern Pacific
	End of branch

NORTHWESTERN PACIFIC

San Francisco, Cal., to Arcata, Cal.
(California Northwestern)

	Junction Points	Connecting Railroads
Via Ferry	San Francisco, Cal.	Atchison, Topeka, & Santa Fe
		North Shore
		Ocean Shore
		Southern Pacific
	Tiburon, Cal.	California Northwestern
	San Rafael, Cal.	North Shore
	Ignacio, Cal.	California Northwestern
	Petaluma, Cal.	California Northwestern
	Santa Rosa, Cal.	California Northwestern
		Southern Pacific
	Fulton, Cal.	California Northwestern
	Healdsburg, Cal.	California Northwestern
Building	Willits, Cal.	California Northwestern
Building	Alton Jc., Cal.	San Francisco & Northwestern
	Arcata, Cal.	Arcata & Mad River
		Oregon & Eureka

Healdsburg, Cal., to Albion, Cal.
(California Northwestern)

Building	Healdsburg, Cal.	California Northwestern
Building	Albion, Cal.	End of branch

Willits, Cal., to Sherwood, Cal.
(California Northwestern)

Junction Points	Connecting Railroads
Willits, Cal.	California Northwestern
Sherwood, Cal.	End of branch

Alton Jc., Cal., to Carlotta, Cal.
(San Francisco & Northwestern)

Alton Jc., Cal.	California Northwestern
Carlotta, Cal.	End of branch

Ignacio, Cal., to Glen Ellen, Cal.

Ignacio, Cal.	California Northwestern
Shellville, Cal.	Southern Pacific
Glen Ellen, Cal.	Southern Pacific
	End of branch

Petaluma, Cal., to Donahue, Cal.

Petaluma, Cal.	California Northwestern
Donahue, Cal.	End of branch

Santa Rosa, Cal., to Sebastopol, Cal.

Santa Rosa, Cal.	California Northwestern
	Southern Pacific
Sebastopol, Cal.	End of branch

Fulton, Cal., to Guerneville, Cal.

Fulton, Cal.	California Northwestern
Guerneville, Cal.	End of branch

San Francisco, Cal., to Cazadero, Cal.
(North Shore)

Via Ferry	San Francisco, Cal.	Atchison, Topeka, & Santa Fe
		California Northwestern
		Ocean Shore
		Southern Pacific
	Sausalito, Cal.	North Shore
Mill Valley Jc., Cal.		North Shore
San Anselmo, Cal.		North Shore
Cazadero, Cal.		End of branch

San Anselmo, Cal., to San Quentin, Cal.
(North Shore)

San Anselmo, Cal.	North Shore
San Rafael, Cal.	California Northwestern
San Quentin, Cal.	End of branch

Mill Valley Jc., Cal., to Mill Valley, Cal.
(North Shore)

	Junction Points	Connecting Railroads
	Mill Valley Jc., Cal.	North Shore
	Mill Valley, Cal.	End of branch

Eureka, Cal., to Trinidad, Cal.
(Oregon & Eureka)

	Junction Points	Connecting Railroads
Via Ferry	Eureka, Cal.	By ferry to Samoa
	Samoa, Cal.	End of track
	Arcata, Cal.	Arcata & Mad River California Northwestern
	Janes Creek, Cal.	Arcata & Mad River
	Trinidad, Cal.	End of line

NORTH YAKIMA & VALLEY

North Yakima, Wash., to Natchez, Wash.

Junction Points	Connecting Railroads
North Yakima, Wash.	Northern Pacific
Natchez, Wash.	End of branch

OCEAN SHORE

TRANSPORTATION
(NINTH DIVISION)

RAILWAY MAIL SERVICE

INTRODUCTION

1. To prepare for an examination of clerk in the **railway mail service,** it is necessary to be thoroughly familiar with the subject of **Transportation.** This subject is not only a very important one in the examination before the Civil Service Commission, but the knowledge obtained from studying it will be of material benefit after you have entered the service, as you will be examined in it from time to time. For this reason, we have made the instruction in this subject particularly thorough, so as to fit you for your work after appointment as well as for the examination. The ninth railway mail division comprises the states of Illinois, Indiana, Ohio, and Michigan.

2. **Outline of Work.**—To acquire a thorough knowledge of Transportation, you will be required to study this Instruction Paper, a map of your railway mail division, and the Official Guide of Railways.

The Instruction Paper contains a list of the railroads in your division arranged in alphabetical order. The names that are given are the names of the railroad systems and not the names of the roads comprising the system. Following the list of railroads is a complete summary of each railroad

Copyrighted by International Textbook Company. All rights reserved

line and all its branch lines. The summary also contains a complete list of the junction points between these terminal points and the connecting railroads at each junction point and at the terminals. The stations after which are printed the words "End of line" or "End of branch" are terminal points of main lines or branch lines; if they are junction points, the name of another railroad is printed above the words "End of line" or "End of branch."

The map that you are to use contains all terminal points, junction points, and the railroads entering them. The relative importance of each station, with regard to population, is distinguished by the following characters: The first character ○ represents towns with not more than 5,000 inhabitants; the second ◉, those with 5,000 to 25,000 inhab-

itants; the third ◎, cities having between 25,000 and 100,000 inhabitants; the fourth ◉, cities of 100,000 inhabitants and over; and the last ★, the state capitals.

The Official Guide of Railways is furnished you so that you will be informed of any current changes that have taken place in the name of the railroads or the names of the operating companies since the printing of this Instruction Paper. The new name or the name of the operating company will always be found in the back part of the Guide under the heading **List of Old and New Names of Roads.** For example, the Detroit Southern will be found under this heading as being operated by the Detroit, Toledo, & Ironton Railroad. Current changes in the names of stations will also be found next following. Example: Cypress Junction, Ill., is now called Junction, Ill. A complete alphabetical list of all railroad stations in the United States, showing the railroad or railroads entering them, is given at the end.

The Guide also contains a general railroad map of all the railroads of the United States as well as complete individual maps of the more prominent ones, and an alphabetical list

of all railroads, which gives an index to the map and the schedule of each.

3. Terms Used.—A **junction point** is the place (city, town, or station) where two or more railroads (using separate tracks) enter, meet, or cross; or it is a place (city, town, or station) from which branch lines of a system diverge. Logansport, Ind., situated on the Pennsylvania and Wabash railroads is an example of the first kind; and Lester, Ohio, on the Baltimore & Ohio, is an example of the second.

A **trunk line** is the main line of a large railroad system having numerous branch lines; for example, the Wabash, which has branches at Fort Wayne, Ind., and Decatur, Ill.

By the **shortest route** is meant either the shortest actual distance or the shortest time distance between two points; in this work we shall consider the shortest distance as the shortest route. The information for either definition, however, can be readily found in the Official Guide of Railways, which contains a schedule of each railroad giving the actual distance and the time distance between stations. For example, you will find from the schedule of the Illinois Central railroad that the actual distance between Chicago, Ill., and Effingham, Ill., is 197.77 miles and that the time distance is 4 hours and 33 minutes.

When a railroad is leased and operated by another railroad, only the name of the operating railroad is shown on the map. Both the name of the operating railroad and the name of the leased railroad, however, are given in the Instruction Paper, as shown on page 16.

4. Care of the Map.—So that the map may always present a smooth surface, it should be mounted on a piece of heavy cardboard. This will preserve the map and prevent its being torn. Proceed in the following manner to mount the map:

Materials Required.—Good liquid glue or mucilage, a small brush, a dry cloth, a sheet of paper slightly larger than the map, and a piece of cardboard somewhat larger than the sheet

of paper. First, unfold the map and lay it flat on the cardboard with the wrong side up and smooth out the creases as best you can with your thumb nail. Next, fold down over the edge of the cardboard about ½ inch of the upper and lower edges of the map; apply the glue with the brush to the folded edges only. Then, reverse the map and place over it a blank sheet of paper and smooth it from the center toward the top and bottom edges with the dry cloth, pressing down the glued edges until they are sufficiently dry to adhere to the cardboard at every point.

HOW TO STUDY

5. Order of Study.—The study of this subject should be conducted as follows: First, tracing the map; second, learning the junction points and the connecting railroads at them; and third, compiling a notebook to contain the railroad routes between prominent cities and all the junction points on these routes, and the connecting railroads at these junction points.

6. Tracing the Map.—Stretch over the map a piece of tracing paper. Tack both the map and the tracing paper to a table or a light, planed board by means of eight thumbtacks. Trace with a sharpened, soft, black pencil the boundary of your division, then the boundary lines of each state in the division. Indicate, on the tracing, the beginning and terminus of the first railroad, the Ann Arbor, which appears on page 11 of this Instruction Paper; for example, indicate the location of Toledo, Ohio, and Frankfort, Mich. Next, with a black lead pencil, mark on the tracing with a character similar to the one on the map the location of each junction point printed on page 11 between these terminal points. Memorize the connecting railroads at each junction point as you indicate them on the tracing. Next, draw the line of this railroad between the junction points indicated on the tracing. In the same manner, locate and draw the line of the second and third railroads, the Arcadia & Betsey River and the Ashland & Western. Next,

indicate on the tracing the beginning and terminus of the main line of the fourth railroad, the Atchison, Topeka, & Santa Fe, from Chicago, Ill., to Fort Madison, Iowa. Then, indicate on the tracing the location of the junction points between these terminal points and memorize the connecting railroads at each junction point as you indicate them. Next, draw, with a different colored pencil, the line of this railroad between the junction points so indicated. Next, mark on the tracing the beginning and terminus of the first branch of the Atchison, Topeka, & Santa Fe that you will find on page 13; for example, Ancona, Ill., and Pekin, Ill. Then, indicate on the tracing, with a character similar to the one on the map, the location of each junction point between these points and mark the names in the same position they appear on the map.

As before, memorize the connecting railroads at each junction point and terminal, then draw, with the same colored pencil that you used for marking the main line, the line of this branch between the junction points indicated. Indicate the next railroad in the same manner, and so continue until you have drawn on the tracing all the railroads comprising your division. The result will be that you will have produced a facsimile of the map that you are studying. Six pencils of different color will be sufficient for this work, since a solid line of one color can represent one railroad and a dotted line of the same color can represent another railroad.* It is not necessary to use different colored pencils on such small railroads as the Arcadia & Betsey River, Au Sable & Northwestern, Blaney & Southern, and Boyne City, Gaylord, & Alpena, as black will do as well. Wherever the name of a railroad is marked on the map, mark it with black pencil on the tracing. This exercise will be of great assistance to you and will impress on your mind the general direction of each railroad system and its branches as well as the junction points and connecting railroads at them; in fact, it should give you a mental picture of the map of your entire division.

*The tracing paper, thumbtacks, and colored pencils are mailed, under separate cover, at the same time as this Instruction Paper.

7. Junction Points and Connecting Railroads.—Begin at page 11 of this Instruction Paper, and study the beginning points, junction points, and terminals of each railroad and each of its branches, also the connecting railroads at each of these points; study these junction points and connecting railroads thoroughly. Do not leave one railroad until you can name, without referring to the book, the beginning and terminus of its main line and its branches, every junction point on it, and the connecting railroads at each of the junction points. After you have accomplished this with the first road, take up the second and then the third, and continue thus until you have finished the entire list. You should conduct this study slowly and systematically and, from time to time, should review from the beginning, so that what you have studied will remain fresh in your memory.

8. Compiling the Notebook.—The object of compiling a notebook is to make you familiar with the manner of answering questions on Transportation. You should select two important cities of your division and find them on your map. Next, follow on the map the railroad or railroads forming the shortest route between them and write the names of the railroads in your notebook. If you are in doubt as to which railroads form the shortest route between the points selected, consult your Official Guide of Railways, and determine the mileage as explained in the following example:

Example: The map shows two ways of connecting, by railroad, Indianapolis, Ind., and Columbus, Ohio; one way by the Pennsylvania, the other by the Cleveland, Cincinnati, Chicago, & St. Louis. The schedule of the Pennsylvania railroad gives the distance between Indianapolis, Ind., and Columbus, Ohio, as 181 miles. The schedule of the Cleveland, Cincinnati, Chicago, & St. Louis railroad gives the distance as 185.3 miles. By comparing these results, it is readily seen that the first route is the shorter and should be the one selected.

Having written the names of the railroads forming the shortest route between the two points selected, write in your

notebook, one under the other, the junction points as they appear on the map. On the same line with each junction point, write the name of the connecting railroad or railroads at that point. Continue in this manner until you have connected, by railroad, all the prominent cities, one with the other. By this method, you will have the entire map in the form of question and answer.

You should procure a notebook that you can conveniently carry in your pocket, size about $4\frac{1}{2}$ inches by 7 inches. This notebook should be carried about with you and studied at all times when opportunity offers. Be careful in doing this work to consult the map and Instruction Paper, in order that you may make no mistakes, and, finally, after completing this work, answer the questions at the end of this Paper without any assistance, and send the answers to us for correction.

FORM OF NOTEBOOK

Chicago, Ill., to Madison, Wis.

Chicago & Northwestern from Chicago, Ill., to Madison, Wis.

Junction Points	Connecting Railroads
Chicago, Ill.	A., T., & S. Fe.
	B. & O.

Madison, Wis.	C. & N. W.
	C., M., & St. P.
	Ill. Cen.

9. Answering Examination Questions.—When answering questions in the subject of Transportation, write in full the names of all railroads, and give the name of the state in which each junction point is located, as many states have junction points of the same name. If more than one railroad is required to connect two cities given in a question, always give the point of connection between the two railroads.

Example.—Name the railroad or railroads forming the shortest route between Marion, Ohio, and Portsmouth, Ohio.

Answer.—The Pennsylvania from Marion, Ohio, to Columbus, Ohio, and the Norfolk & Western from Columbus, Ohio, to Portsmouth, Ohio.

LIST OF RAILROADS AND ABBREVIATIONS FOR THEM

Name of Railroad	Abbreviations
Ann Arbor	A. A.
Arcadia & Betsey River	A. & B. R.

TRANSPORTATION
(TENTH DIVISION)

RAILWAY MAIL SERVICE

INTRODUCTION

1. To prepare for an examination for clerk in the **railway mail service,** it is necessary to be thoroughly familiar with the subject of **Transportation.** This subject is not only a very important one in the examination before the Civil Service Commission, but the knowledge obtained from studying it will be of material benefit after you have entered the service, as you will be examined in it from time to time. For this reason, we have made the instruction in this subject particularly thorough so as to fit you for your work after appointment as well as for the examination. The tenth railway mail division comprises the states of Wisconsin, northern peninsula of Michigan, Minnesota, North Dakota, Montana, and South Dakota, excluding the southwestern part, called the Black Hills district.

2. Outline of Work.—To acquire a thorough knowledge of Transportation, you will be required to study this Instruction Paper, a map of your railway mail division, and the Official Guide of Railways.

The Instruction Paper contains a list of the railroads in your division arranged in alphabetical order. The names that are given are the names of the railroad systems and not the names of the roads comprising the system. Following

Copyrighted by International Textbook Company. All rights reserved

the list of railroads is a complete summary of each railroad line and all its branch lines. This summary also contains a complete list of the junction points between these terminal points and the connecting railroads at each junction point and at the terminals. The stations after which are printed the words "End of line" or "End of branch" are terminal points of main lines or branch lines; if they are junction points, the name of another railroad is printed above the words "End of line" or "End of branch."

The map that you are to use contains all terminal points, junction points, and the railroads entering them. The relative importance of each station, with regard to population, is distinguished by the following characters: The first character ○ represents towns with not more than 5,000 inhabitants; the second ◉, those with 5,000 to 25,000 inhab-

itants; the third ◎, cities having between 25,000 and 100,000 inhabitants; the fourth ◉, cities of 100,000 inhabitants and over, and the last ★, the state capitals.

The Official Guide of Railways is furnished you so that you will be informed of any current changes that have taken place in the name of the railroads or the names of the operating companies since the printing of this Instruction Paper. The new name or the name of the operating company will always be found in the back part of the Guide under the heading **List of Old and New Names of Roads.** For example, the Detroit Southern will be found under this heading as being operated by the Detroit, Toledo, & Ironton railroad. Current changes in the names of stations will also be found next following. Example: St. Croix Crossing, Minn., is now called Hastings, Minn. A complete alphabetical list of all railroad stations in the United States, showing the railroad or railroads entering them, is given at the end.

The Guide also contains a general railroad map of all the railroads of the United States as well as complete individual

maps of the more prominent ones, and an alphabetical list of all railroads, which gives an index to the map and the schedule of each.

3. Terms Used.—A **junction point** is the place (city, town, or station) where two or more railroads (using separate tracks) enter, meet, or cross, or it is a place (city, town, or station) from which branch lines of a system diverge. Butte, Mont., situated on the Butte, Anaconda, & Pacific, Great Northern, Northern Pacific, and Oregon Short Line railroads, is an example of the first kind; and Hardwick, Minn., on the Chicago, Rock Island, & Pacific is an example of the second.

A **trunk line** is the main line of a large railroad system having numerous branch lines; for example, the Chicago, Burlington, & Quincy, which has branches at Edgemont, S. Dak., and Toluca, Mont.

By the **shortest route** is meant either the shortest actual distance or the shortest time distance between two points; in this work, we will consider the shortest distance as the shortest route. The information for either definition, however, can be readily found in the Official Guide of Railways, which contains a schedule of each railroad, giving the actual distance and the time distance between stations. For example, you will find from the schedule of the Great Northern railroad that the actual distance between St. Paul, Minn., and Fargo, N. Dak., is 242 miles and that the time distance is 7 hours and 25 minutes.

When a railroad is leased and operated by another railroad, only the name of the operating railroad is shown on the map. Both the name of the operating railroad and the name of the leased railroad, however, are given in the Instruction Paper, as shown on page 52.

4. Care of the Map.—So that the map may always present a smooth surface, it should be mounted on a piece of heavy cardboard. This will preserve the map and prevent its being torn. Proceed in the following manner to mount the map:

Materials Required.—Good liquid glue or mucilage, a small brush, a dry cloth, a sheet of paper slightly larger than the map, and a piece of cardboard somewhat larger than the sheet of paper. First, unfold the map and lay it flat on the cardboard with the wrong side up and smooth out the creases as best you can with your thumb nail. Next, fold down over the edge of the cardboard about $\frac{1}{2}$ inch of the upper and lower edges of the map; apply the glue with the brush to the folded edges only. Then reverse the map and place over it a blank sheet of paper and smooth it from the center toward the top and bottom edges with the dry cloth, pressing down the glued edges until they are sufficiently dry to adhere to the cardboard at every point.

HOW TO STUDY

5. Order of Study.—The study of this subject should be conducted as follows: First, tracing the map; second, learning the junction points and the connecting railroads at them; and third, compiling a notebook to contain the railroad routes between prominent cities and all the junction points on these routes, and the connecting railroads at these junction points.

6. Tracing the Map.—Stretch over the map a piece of tracing paper with the dull side up. Tack both the map and the tracing paper to a table or a light planed board by means of eight thumbtacks. Trace with a sharpened, soft, black pencil the boundary of your division, then the boundary lines of each state in the division. Indicate, on the tracing, with a character similar to the one used on the map, the beginning and the terminus of the first railroad, the Abbotsford & Northeastern, which appears on page 10 of this Instruction Paper; for example, indicate the location of Abbotsford, Wis., and Athens, Wis. Memorize the connecting railroads at each terminal point as you indicate it on the tracing. Mark the names of these terminal points in the same position that they appear on the map, and then draw the line of the railroad between these terminal points. Next,

indicate the beginning and terminus of the Ann Arbor railroad between Toledo, Ohio, and Frankfort, Mich. Then, with the black lead pencil, mark on the tracing with a character similar to the one on the map the location of each junction point, printed on pages 10 and 11, between these terminal points. Mark the names of these junction and terminal points in the same position they appear on the map and memorize the names of the connecting railroads at each junction and terminal point as you indicate them on the tracing. Next, draw with a different colored pencil the line of this railroad between the junction points indicated on the tracing. Proceed in the same manner with the Arcadia & Betsey River railroad and so continue until you have drawn on the tracing all the railroads comprising this division; the result will be that you will have produced a facsimile of the map that you are studying. Six pencils of different color will be sufficient for this work, since a solid line of one color can represent one railroad and a dotted line of the same color can represent another railroad.* It is not necessary to use different colored pencils on such small railroads as the Abbotsford & Northeastern, Ashland, Odanah, & Marengo, and Au Sable & Northwestern railroads as black will do as well. Wherever the name of a railroad is marked on the map, mark it with black pencil on the tracing. This exercise will be of great assistance to you and will impress on your mind the general direction of each railroad system and its branches, as well as the junction points and connecting railroads at them; in fact, it should give you a mental picture of the map of your entire division.

7. Junction Points and Connecting Railroads.—Begin at page 10 of this Instruction Paper, and study the beginning points, junction points, and terminals of each railroad and each of its branches, also of the connecting railroads at each of these points; study these junction points and connecting railroads thoroughly. Do not leave one railroad until you

* The tracing paper, thumbtacks, and colored pencils are mailed, under separate cover, at the same time as this Instruction Paper.

can name, without referring to the book, the beginning and terminus of its main line and its branches, every junction point on it, and the connecting railroads at each of the junction points. After you have accomplished this with the first road, take up the second and then the third, and continue thus until you have finished the entire list. You should conduct this study slowly and systematically and, from time to time, should review from the beginning, so that what you have studied will remain fresh in your memory.

8. Compiling the Notebook.—The object of compiling a notebook is to make you familiar with the manner of answering questions on Transportation. You should select two important cities of your division and find them on your map. Next, follow on the map the railroad or railroads forming the shortest route between them and write the names of the railroads in your notebook. If you are in doubt as to which railroad or railroads form the shortest route between the points selected, consult your Official Guide of Railways, and determine the mileage as explained in the following example:

Example: The map shows two ways of connecting, by railroad, Duluth, Minn., and Grand Forks, N. Dak., namely the Great Northern and the Northern Pacific railroads. The schedule of the Great Northern railroad gives the distance between Duluth, Minn., and Grand Forks, N. Dak., as 297 miles. The schedule of the Northern Pacific gives the distance as 326 miles. By comparing these results, it is readily seen that the first route is the shorter and should be the one selected.

Having written the names of the railroads forming the shortest route between the two points selected, write in your notebook, one under the other, the junction points as they appear on the map. On the same line with each junction point, write the name of the connecting railroad or railroads at that point. Continue in this manner until you have connected, by railroad, all the prominent cities, one with the other. By this method, you will have the entire map in the form of question and answer.

You should procure a notebook that you can conveniently carry in your pocket, size about 4½ inches by 7 inches. This notebook should be carried about with you and studied at all times when opportunity offers. Be careful in doing this work and consult the map and Instruction Paper, in order that you may make no mistakes, and finally, after completing this work, answer the questions at the end of this Paper without any assistance, and send the answers to us for correction.

FORM OF NOTEBOOK

Dubuque, Iowa, to St. Paul, Minn.

Chicago, Milwaukee, & St. Paul from Dubuque, Iowa, to St. Paul, Minn.

Junction Points	Connecting Railroads
Dubuque, Iowa	C., B., & Q.
	C. G. W.
	Ill. Cen.
Turkey River, Iowa	C., M., & St. P.
North McGregor, Iowa	C., M., & St. P.

	M., St. P., & S. S. M.
	Nor. Pac.
	Wis. Cen.

9. Answering Examination Questions.—When answering questions in the subject of Transportation, write in full the names of all railroads, and give the name of the state in which

each junction point is located, as many states have junction points of the same name.

EXAMPLE.—Name the railroad or railroads forming the shortest route between St. Paul, Minn., and Duluth, Minn.

ANSWER.—The Northern Pacific from St. Paul, Minn., to Duluth, Minn.

If more than one railroad is required to connect two cities given in a question, always give the point of connection between the two railroads.

TRANSPORTATION
(ELEVENTH DIVISION)

RAILWAY MAIL SERVICE

INTRODUCTION

1. To prepare for an examination for clerk in the **railway mail service,** it is necessary to be thoroughly familiar with the subject of **Transportation.** This subject is not only a very important one in the examination before the Civil Service Commission, but the knowledge obtained from studying it will be of material benefit after you have entered the service, as you will be examined in it from time to time. For this reason, we have made the instruction in this subject particularly thorough so as to fit you for your work after appointment as well as for the examination. The eleventh railway mail division comprises the states of Arkansas, Oklahoma, Texas, and Louisiana, west of the Mississippi river.

2. **Outline of Work.**—To acquire a thorough knowledge of Transportation, you will be required to study this Instruction Paper, a map of your railway mail division, and the Official Guide of Railways.

The Instruction Paper contains a list of the railroads in your division arranged in alphabetical order. The names that are given are the names of the railroad systems and not the names of the roads comprising the system. Following the list of railroads is a complete summary of each railroad

Copyrighted by International Textbook Company. All rights reserved.

mentioned, giving the beginning and terminus of its main line and all its branch lines. This summary also contains a complete list of the junction points between these terminal points and the connecting railroads at each junction point and at the terminals. The stations after which are printed the words "End of line" or "End of branch" are terminal points of main lines or branch lines; if they are junction points, the name of another railroad is printed above the words "End of line" or "End of branch."

The map that you are to use contains all terminal points, junction points, and the railroads entering them. The relative importance of each station, with regard to population, is distinguished by the following characters: The first character ○, represents towns with not more than 5,000 inhabitants; the second ◉, those with 5,000 to 25,000 inhab-

itants; the third ◎, cities having between 25,000 and 100,000 inhabitants; the fourth ◉, cities of 100,000 inhabitants and over; and the last ★, the state capitals.

The Official Guide of Railways is furnished you so that you will be informed of any current changes that have taken place in the name of the railroads or the names of the operating companies since the printing of this Instruction Paper. The new name or the name of the operating company will always be found in the back part of the Guide under the heading **List of Old and New Names of Roads.** For example, the Arkansas Valley & Western will be found under this heading as being operated by the St. Louis & San Francisco railroad. Current changes in the names of stations will also be found next following. Example: Vermejo, N. Mex., is now called Colfax, N. Mex. A complete alphabetical list of all railroad stations in the United States, showing the railroad or railroads entering them, is given at the end.

The Guide also contains a general railroad map of all the railroads of the United States as well as complete individual

maps of the more prominent ones, and an alphabetical list of all railroads, which gives an index to the map and the schedule of each.

3. Terms Used.—A **junction point** is the place (city, town, or station) where two or more railroads (using separate tracks) enter, meet, or cross; or it is a place (city, town, or station) from which branch lines of a system diverge. Dallas, Tex., situated on the Atchison, Topeka, & Santa Fe; Chicago, Rock Island, & Gulf; Houston & Texas Central; Missouri, Kansas, & Texas; St. Louis Southwestern; Texas & New Orleans; Texas & Pacific, and Trinity & Brazos Valley railroads is an example of the first kind; and McFarland, Kans., on the Chicago, Rock Island, & Pacific, is an example of the second.

A **trunk line** is the main line of a large railroad system having numerous branch lines; for example, the Houston & Texas Central, which has branches at Hempstead, Tex., Fairland, Tex., Navasota, Tex., Bremond, Tex., and Garrett, Tex.

By the **shortest route** is meant either the shortest actual distance or the shortest time distance between two points; in this work we shall consider the shortest distance as the shortest route. The information for either definition, however, can be readily found in the Official Guide of Railways, which contains a schedule of each railroad, giving the actual distance and the time distance between stations. For example, you will find from the schedule of the Southern Pacific railroad that the actual distance between El Paso, Tex., and San Antonio, Tex., is 623 miles and that the time distance is 12 hours.

When a railroad is leased and operated by another railroad, the name of the operating company and the name of the leased railroad are both shown on the map, as well as in the Instruction Paper.

4. Care of the Map.—So that the map may always present a smooth surface, it should be mounted on a piece of heavy cardboard. This will preserve the map and prevent

its being torn. Proceed to mount the map in the following manner:

Materials Required.—Good liquid glue or mucilage, a small brush, a dry cloth, a sheet of paper slightly larger than the map, and a piece of cardboard somewhat larger than the sheet of paper. First, unfold the map and lay it flat on the cardboard with the wrong side up and smooth out the creases as best you can with your thumb nail. Next, fold down over the edge of the cardboard about $\frac{1}{2}$ inch of the upper and lower edges of the map; apply the glue with the brush to the folded edges only. Then, reverse the map and place over it the blank sheet of paper and smooth it from the center toward the top and bottom edges with the dry cloth, pressing down the glued edges until they are sufficiently dry to adhere to the cardboard at every point.

HOW TO STUDY

5. Order of Study.—The study of this subject should be conducted as follows: First, tracing the map; second, learning the junction points and the connecting railroads at them; and third, compiling a notebook to contain the railroad routes between prominent cities and all the junction points on these routes, and the connecting railroads at these junction points.

6. Tracing the Map.—Stretch over the map a piece of tracing paper. Tack both the map and the tracing paper to a table or a light, planed board by means of eight thumbtacks. Trace with a sharpened, soft, black pencil the boundary of your division, then the boundary lines of each state in the division. Indicate, on the tracing, the beginning and terminus of the first railroad, the Acme, Red River, & Northern, that appears on page 13 of this Instruction Paper; for example, indicate the location of Acme, Tex., and Quanah, Tex. Next, with a black lead pencil, mark on the tracing, with a character similar to the one on the map, the location of these terminal points. Memorize the connecting railroads at each as you indicate them on the tracing.

Mark the names of these terminal points in the same position that they appear on the map. Next, draw with a black pencil the line of this railroad between the terminal points indicated on the tracing. Next, mark on the tracing the location of the beginning and terminus of the second railroad, the Angelina & Neches River, that appears on page 13; indicate the location of Manton, Tex., and Keltys, Tex., and with a black lead pencil, mark on the tracing, with a character similar to the one on the map, the location of these terminals. Memorize the connecting railroads at each terminal point as you indicate them on the tracing. Mark the names of these terminal points in the same position that they appear on the map. Next, draw, with a black pencil, the line of this railroad between the terminal points indicated on the tracing. Proceed in the same manner with the Arkansas & Gulf, Arkansas & Louisiana, and Arkansas Central. Next, indicate on the tracing the beginning and terminus of the main line of the Arkansas, Louisiana, & Gulf railroad, between Monroe, La., and Pine Bluff, Ark. Next, with a black lead pencil, mark on the tracing, with a character similar to the one on the map, the location of each junction point printed on page 14 between these terminal points. Memorize the connecting railroads at each junction point as you indicate them on the tracing. Mark the names of these junctions in the same positions that they appear on the map. Next, draw, with a different colored pencil, the line of this railroad between the junction points indicated on the tracing. Mark on the tracing the beginning and terminus of the branch of the Arkansas, Louisiana, & Gulf railroad that you will find on page 14; for example, Rolfe Jc., Ark., to Crossett, Ark. As before, memorize the connecting railroads at each terminal, then draw, with the same colored pencil that you used for marking the main line, the line of this branch between the points indicated. Continue this operation until you have traced the entire system. Indicate the next railroad and continue in this manner until you have drawn, on the tracing, all the railroads comprising your division; the result will be that you will have produced a facsimile of the map that you

are studying. Six pencils of different color will be sufficient for this work, since a solid line of one color can represent one railroad and a dotted line of the same color can represent another railroad.* It is not necessary to use different colored pencils on such small railroads as the Acme, Red River, & Northern, Angelina & Neches River, Arkansas & Gulf, Arkansas & Louisiana, Arkansas Central, Arkansas Midland, Arkansas Southeastern, and the Arkansas Southwestern, as black will do as well. Wherever the name of a railroad is marked on the map, mark it with black pencil on the tracing. This exercise will be of great assistance to you and will impress on your mind the general direction of each railroad system and its branches, as well as the junction points and connecting railroads at them; in fact, it should give you a mental picture of the map of your entire division.

7. Junction Points and Connecting Railroads.—Begin at page 13 of this Instruction Paper, and study the junction points and terminals of each railroad and each of its branches, also of the connecting railroads at each of these points; study these junction points and connecting railroads thoroughly. Do not leave one railroad until you can name, without referring to the book, the beginning and terminus of its main line and its branches, every junction point on it, and the connecting railroads at each of the junction points. After you have accomplished this with the first road, take up the second and then the third, and continue thus until you have finished the entire list. You should conduct this study slowly and systematically and, from time to time, should review from the beginning, so that what you have studied will remain fresh in your memory.

8. Compiling the Notebook.—The object of compiling a notebook is to make you familiar with the manner of answering questions on Transportation. You should select two important cities of your division and find them on your map. Next, follow on the map the railroad or railroads forming

*The tracing paper, thumbtacks, and colored pencils are mailed, under separate cover, at the same time as this Instruction Paper.

the shortest route between them and write the names of the railroads in your notebook. If you are in doubt as to which railroad or railroads form the shortest route between the points selected, consult your Official Guide of Railways, and determine the mileage as explained in the following example:

Example: the map shows two ways of connecting, by railroad, New Orleans, La., and Dallas, Tex. One way is by the Texas & Pacific, and the other by the Southern Pacific. The schedule of the Texas & Pacific gives the distance between these points as 514.7 miles and the schedule of the Southern Pacific gives the distance between the same points as 567 miles. By comparing these results, it is readily seen that the first route is the shorter and should be the one selected.

Having written the names of the railroads forming the shortest route between the two points selected, write in your notebook, one under the other, the junction points as they appear on the map. On the same line with each junction point, write the name of the connecting railroad or railroads at that point. Continue in this manner until you have connected, by railroad, all the prominent cities, one with the other. By this method, you will have the entire map in the form of question and answer.

You should procure a notebook that you can conveniently carry in your pocket, size about $4\frac{1}{2}$ inches by 7 inches. This notebook should be carried about with you and studied at all times when opportunity offers. Be careful in doing this work to consult the map and Instruction Paper, in order that you may make no mistakes, and finally, after completing this work, answer the questions at the end of this Paper without any assistance, and send the answers to us for correction.

FORM OF NOTEBOOK

New Orleans, La., to Texarkana, Tex.

Texas & Pacific from New Orleans, La., to Texarkana, Tex.

Junction Points	Connecting Railroads
New Orleans, La.	Ill. Cen.

Texarkana, Tex	St. L., I. M., & S.
	St. L. S. W.
	St. L. S. W. of T.
	T. & Ft. S.
	Tex. & Pac.
	End of branch

9. Answering Examination Questions.—When answering questions on the subject of Transportation, write, in full, the names of all railroads, and give the name of the state in which each junction point is located, as many states have junction points of the same name. If more than one railroad is required to connect two cities given in a question, always give the point of connection between the two railroads.

Example.—Name the railroad or railroads forming the shortest route between Shreveport, La., and San Antonio, Tex.

Answer.—The Gulf Air Line from Shreveport, La., to Houston, Tex., and the Southern Pacific from Houston, Tex., to San Antonio, Tex.

Morgan, Tex.	Gulf, Colorado, & Santa Fe
Alexander, Tex.	Stephenville, North & South Texas
Dublin, Tex.	Fort Worth & Rio Grande
Cisco, Tex.	Texas & Pacific
Stamford, Tex.	Wichita Valley
Rotan, Tex.	End of line

TEXAS MIDLAND

Paris, Tex., to Ennis, Tex.

Junction Points	Connecting Railroads
Paris, Tex.	Gulf, Colorado, & Santa Fe
	Paris & Great Northern
	Texas & Pacific
Via St. Louis Southwestern: Commerce, Tex.	St. Louis Southwestern
Via St. Louis Southwestern: Greenville, Tex.	Missouri, Kansas, & Texas
	St. Louis Southwestern

Junction Points	Connecting Railroads
Terrell, Tex.	Texas & Pacific
Kaufman, Tex.	Texas & New Orleans
Ennis, Tex.	Houston & Texas Central
	End of line

TEXAS SHORT LINE

Hoyt, Tex., to Grand Saline, Tex.

Junction Points	Connecting Railroads
Hoyt, Tex.	Missouri, Kansas, & Texas
Grand Saline, Tex.	Texas & Pacific
	End of line

TEXAS SOUTHEASTERN

Cowart, Tex., to Lufkin, Tex.

Junction Points	Connecting Railroads
Cowart, Tex.	St. Louis Southwestern
Diboll, Tex.	Houston, East & West Texas
Lufkin, Tex.	Eastern Texas
	Houston, East & West Texas
	St. Louis Southwestern
	End of line

TEXAS SOUTHERN

Winnsboro, Tex., to Marshall, Tex.

Junction Points	Connecting Railroads
Winnsboro, Tex.	Missouri, Kansas, & Texas
Whiteman, Tex.	Texas Southern
Gilmer, Tex.	St. Louis Southwestern of Texas
Sully, Tex.	Texas Southern
Harleton, Tex.	Texas Southern
Pine Ridge, Tex.	Texas Southern
Marshall, Tex.	Texas & Pacific
	End of line

Whiteman, Tex., to Decker, Tex.

Whiteman, Tex.	Texas Southern
Decker, Tex.	End of branch

Sully, Tex., to Whitford, Tex.

Sully, Tex.	Texas Southern
Whitford, Tex.	End of branch

Harleton, Tex., to Lodwick, Tex.

Junction Points	Connecting Railroads
Harleton, Tex.	Texas Southern
Lodwick, Tex.	End of branch

Pine Ridge, Tex., to Torrans, Tex.

Pine Ridge, Tex.	Texas Southern
Torrans, Tex.	End of branch

TEXAS STATE

Rusk, Tex., to Palestine, Tex.

Junction Points	Connecting Railroads
Rusk, Tex.	St. Louis Southwestern
Palestine, Tex.	International & Great Northern End of line

THORNTON & ALEXANDRIA

Thornton, Ark., to Hampton, Ark.

Junction Points	Connecting Railroads
Thornton, Ark.	St. Louis Southwestern
Hampton, Ark.	End of line

TIMPSON & NORTHWESTERN

Timpson, Tex., to Ragley, Tex.

Junction Points	Connecting Railroads
Timpson, Tex.	Houston, East & West Texas Texas & Gulf
Ragley, Tex.	End of line

TREMONT & GULF

Tremont, La., to Winnfield, La.

Junction Points	Connecting Railroads
Tremont, La.	Vicksburg, Shreveport, & Pacific
Sikes, La.	Tremont & Gulf
Menefee, La.	Tremont & Gulf
Winnfield, La.	Arkansas Southern Louisiana & Arkansas Louisiana Railway & Navigation Co. End of line

Sikes, La., to Jonesboro, La.
(Building)

Junction Points	Connecting Railroads
Sikes, La.	Tremont & Gulf
Jonesboro, La.	Arkansas Southern
	End of branch

Pyburn, La., to Rochelle, La.

	Junction Points	Connecting Railroads
	Pyburn, La.	Arkansas Southern
Building	Menefee, La.	Tremont & Gulf
Building	Rochelle, La.	St. Louis, Iron Mountain, & Southern
		End of branch

TRINITY VALLEY SOUTHERN

Dodge, Tex., to Oakhurst, Tex.

Junction Points	Connecting Railroads
Dodge, Tex.	International & Great Northern
Oakhurst, Tex.	End of line

ULTIMA THULE, ARKADELPHIA, & MISSISSIPPI

Daleville, Ark., to Sparkman Jc., Ark.

Junction Points	Connecting Railroads
Daleville, Ark.	St. Louis, Iron Mountain, & Southern
Sparkman Jc., Ark.	End of line

VICTORIA, FISHER, & WESTERN

Victoria, La., to Cain, La.

Junction Points	Connecting Railroads
Victoria, La.	Texas & Pacific
Fisher, La.	Kansas City Southern
Cain, La.	End of line

WARREN & CORSICANA PACIFIC

Warren, Tex., to Big Kimbrel, Tex.

Junction Points	Connecting Railroads
Warren, Tex.	Texas & New Orleans
Big Kimbrel, Tex.	End of line

WARREN & OUACHITA VALLEY

Warren, Ark., to Banks, Ark.

Junction Points	Connecting Railroads
Warren, Ark.	St. Louis, Iron Mountain, & Southern
Banks, Ark.	Chicago, Rock Island, & Pacific
	St. Louis, Iron Mountain, & Southern
	End of line

WEATHERFORD, MINERAL WELLS, & NORTHWESTERN

Weatherford, Tex., to Graford, Tex.

Junction Points	Connecting Railroads
Weatherford, Tex.	Gulf, Colorado, & Santa Fe
	Texas & Pacific
Graford, Tex.	End of line

WICHITA FALLS & NORTHWESTERN

Wichita Falls, Tex., to Frederick, Okla.

Junction Points	Connecting Railroads
Wichita Falls, Tex.	Fort Worth & Denver City
	Missouri, Kansas, & Texas
	Wichita Falls & Southern
	Wichita Valley
Frederick, Okla.	St. Louis & San Francisco
	End of line

WICHITA FALLS & SOUTHERN

Wichita Falls, Tex., to Olney, Tex.

Junction Points	Connecting Railroads
Wichita Falls, Tex.	Fort Worth & Denver City
	Missouri, Kansas, & Texas
	Wichita Falls & Northwestern
	Wichita Valley
Olney, Tex.	End of line

WYANDOTTE & SOUTHEASTERN

Wyandotte, Ark., to Gorham, Ark.

Junction Points	Connecting Railroads
Wyandotte, Ark.	St. Louis, Iron Mountain, & Southern
Gorham, Ark.	End of line

ZACHARY & NORTHEASTERN

Zachary, La., to Pride, La.

Junction Points	Connecting Railroads
Zachary, La.	Yazoo & Mississippi Valley
Pride, La.	End of line

A SERIES OF QUESTIONS

Relating to the Subjects Treated of in This Volume.

It will be noticed that the questions contained in the following pages are divided into sections corresponding to the sections of the text of the preceding pages, so that each section has a headline that is the same as the headline of the section to which the questions refer. No attempt should be made to answer any of the questions until the corresponding part of the text has been carefully studied.

TRANSPORTATION
(SEVENTH DIVISION)

EXAMINATION QUESTIONS

(*In answering these questions use the same form as given on Sheet 6 of the Preliminary Examination.*)

(1) Name the railroad or railroads that form the shortest route between Atchison, Kans., and Roswell, N. Mex.; name four junction points, between these cities, on the required railway route; name one connecting railroad at each junction point.

(2) Name the railroad or railroads that form the shortest route between Denver, Colo., and Leavenworth, Kans.; name four junction points on the route between these cities.

(3) Name the railroad or railroads that form the shortest route between: St. Joseph, Mo., and Joplin., Mo; Colorado Springs, Colo., and McFarland, Kans.; Texico, N. Mex., and Pecos, Tex.

(4) Name five junction points and the connecting railroads at them on the Kansas City, Mexico, & Orient between Kansas City, Mo., and Cherokee, Okla.

(5) Name the railroad or railroads that form the shortest route between Fort Madison, Iowa, and Great Bend, Kans.; name four junction points, between these cities, on the required railway route; name one connecting railroad at each junction point.

(6) Name the railroad or railroads that form the shortest route between El Paso, Tex., and Topeka, Kans.; name four junction points on the route between these cities.

(7) Name the railroad or railroads that form the shortest route between: Dodge City, Kans., and Pueblo, Colo.; St. Charles, Mo., and St. Joseph, Mo.; Concordia, Kans., and Leavenworth, Kans.

(8) Name two railroads that enter: Centralia, Mo.; Lyons, Kans.; Colorado Springs, Colo.; Deming, N. Mex.

(9) Name the railroad or railroads that form the shortest route between Grand Junction, Colo., and Rincon, N. Mex.; name four junction points, between these cities, on the required railway route; name one connecting railroad at each junction point.

(10) Name the railroad or railroads that form the shortest route between Parsons, Kans., and St. Louis., Mo.; name four junction points on the route between these cities.

(11) Name the railroad or railroads that form the shortest route between: Gunnison, Colo., and Trinidad, Colo.; Jefferson City, Mo., and McPherson, Kans.; Durango, Colo., and La Junta, Colo.

(12) Name five junction points and the connecting railroads at them on the St. Louis, Rocky Mountain, & Pacific between Des Moines, N. Mex., and Taos, N. Mex.

(13) Name the railroad or railroads that form the shortest route between Pueblo, Colo., and Kansas City, Mo.; name four junction points, between these cities, on the required railway route; name one connecting railroad at each junction point.

(14) Name the railroad or railroads that form the shortest route between St. Louis, Mo., and Ellsworth, Kans.; name four junction points on the route between these cities.

(15) Name the railroad or railroads that form the shortest route between: Fort Scott, Kans., and Hannibal, Mo.; Belen, N. Mex., and Leadville, Colo.; Springfield, Mo., and Arcadia, Kans.

(16) Name two railroads that enter: Independence, Mo.; Salina, Kans.; Santa Rosa, N. Mex.; Roswell, Colo.

TRANSPORTATION

(EIGHTH DIVISION)

EXAMINATION QUESTIONS

(In answering these questions, use the same form as given on Sheet 6 of the Preliminary Examination.)

(1) Name the railroad or railroads that form the shortest route between San Francisco, Cal., and Bowie, Ariz.; name four junction points between the two cities, on the required railway route; name one connecting railroad at each junction point.

(2) Name the railroad or railroads that form the shortest route between Shelby, Mont., and Everett, Wash.; name four junction points on the route between these cities.

(3) Name the railroad or railroads that form the shortest route between: Everett, Wash., and New Westminster, Can.; Warrenton, Ore., and Goble, Ore.; Biggs, Ore., and Shaniko, Ore.

(4) Name four junction points and one connecting railroad at each junction point on the Tonopah & Tidewater between Tonopah, Nev., and Ludlow, Cal.

(5) Name the railroad or railroads that form the shortest route between Caliente, Nev., and Butte, Mont.; name four junction points between the two cities, on the required railway route; name one connecting railroad at each junction point.

(6) Name the railroad or railroads that form the shortest route between Vancouver, Wash., and Tacoma, Wash.; name four junction points on the route between these cities.

(7) Name the railroad or railroads that form the shortest route between: Pasco, Wash., and Athena, Ore.; Weiser, Idaho, and Council, Idaho; Phoenix, Ariz., and Ash Forks, Ariz.

(8) Name two railroads that enter: Reno, Nev.; East Portland, Ore.; Naco, Ariz.; Mammoth, Utah.

(9) Name the railroad or railroads that form the shortest route between Keeler, Cal., and Eureka, Nev.; name four junction points between the two cities, on the required railway route; name one connecting railroad at each junction point.

(10) Name the railroad or railroads that form the shortest route between Grand Junction, Colo., and Bingham, Utah; name four junction points on the route between these cities.

(11) Name the railroad or railroads that form the shortest route between: Bowie, Ariz., and Globe, Ariz.; Santa Barbara, Cal., and San Francisco, Cal.; Salem, Ore., and Vallejo, Cal.

(12) Name five junction points and one connecting railroad at each junction point on the Western Pacific between Salt Lake City, Utah, and Oakland, Cal.

(13) Name the railroad or railroads that form the shortest route between Fresno, Cal., and Grand Canyon, Ariz.; name four junction points between the two cities, on the required railway route; name one connecting railroad at each junction point.

(14) Name the railroad or railroads that form the shortest route between San Diego, Cal., and Reno, Nev.; name four junction points on the route between these cities.

(15) Name the railroad or railroads that form the shortest route between: Port Townsend, Wash., and Quilcene, Wash.; Pasco, Wash., and Monte Cristo, Wash.; Plumas, Cal., and Alturas, Cal.

(16) Name two railroads that enter: Los Angeles, Cal.; Mound House, Nev.; Athena, Ore.; Cochise, Ariz.

TRANSPORTATION
(NINTH DIVISION)

EXAMINATION QUESTIONS

(In answering these questions use the same form as given on Sheet 6 of the Preliminary Examination.)

(1) Name the railroad or railroads that form the shortest route between Buffalo, N. Y., and Detroit, Mich.; name four junction points between these cities, on the required railway route; name one connecting railroad at each junction point.

(2) Name the railroad or railroads that form the shortest route between Detroit, Mich., and Chicago, Ill.; name four junction points on the route between these cities.

(3) Name the railroad or railroads that form the shortest route between: Portsmouth, Ohio, and Marion, Ohio; Lafayette, Ind., and New Albany, Ind.; Columbus, Ohio, and Cleveland, Ohio; Michigan City, Ind., and Greencastle, Ind.

(4) Name four junction points and the connecting railroads at them on the Chicago, Milwaukee, & Gary between Rockford, Ill., and Momence, Ill.

(5) Name the railroad or railroads that form the shortest route between Terre Haute, Ind., and Sandusky, Ohio; name four junction points between these cities, on the required railway route; name one connecting railroad at each junction point.

(6) Name the railroad or railroads that form the shortest route between Chicago, Ill., and Zanesville, Ohio; name four junction points on the route between these cities.

(7) Name the railroad or railroads that form the shortest route between: Steubenville, Ohio, and Springfield, Ohio; Elkhart, Ind., and Anderson, Ind.; Louisville, Ky., and Fort Wayne, Ind.; Cairo, Ill., and Freeport, Ill.

(8) Name two railroads that enter: Joliet, Ill.; Lima, Ohio; Bedford, Ind.; Ionia, Mich.

(9) Name the railroad or railroads that form the shortest route between Louisville, Ky., and Detroit, Mich.; name four junction points between these cities, on the required railway route; name one connecting railroad at each junction point.

(10) Name the railroad or railroads that form the shortest route between Cincinnati, Ohio, and Mackinaw City, Mich.; name four junction points on the route between these cities.

(11) Name the railroad or railroads that form the shortest route between: Niagara Falls, N. Y., and Detroit, Mich.; Detroit, Mich., and Toledo, Ohio; Bay City, Mich., and Kalamazoo, Mich.; Superior, Wis., and Marquette, Mich.

(12) Name five junction points and the connecting railroads at them on the Indianapolis Southern between Indianapolis, Ind., and Effingham, Ill.

(13) Name the railroad or railroads that form the shortest route between Cincinnati, Ohio, and Cheboygan, Mich.; name four junction points between these cities, on the required railway route; name one connecting railroad at each junction point.

(14) Name the railroad or railroads that form the shortest route between Cairo, Ill., and Cleveland, Ohio.

(15) Name the railroad or railroads that form the shortest route between: Springfield, Ohio, and Peoria, Ill.; Hamilton, Ohio, and Springfield, Ill.; Terre Haute, Ind., and Westport, Ind.; Madison, Wis., and Centralia, Ill.

(16) Name two railroads that enter: Ishpeming, Mich.; Findlay, Ohio; Evansville, Ind.; Galena, Ill.

TRANSPORTATION

(TENTH DIVISION)

EXAMINATION QUESTIONS

(*In answering these questions use the same form as given on Sheet 6 of the Preliminary Examination*)

(1) Name the railroad or railroads that form the shortest route between Minneapolis, Minn., and Rexford, Mont.; name four junction points between these cities, on the required railway route, and name one connecting railroad at each junction point.

(2) Name the railroad or railroads that form the shortest route between Edgeley, N. Dak., and Sioux Falls, S. Dak.; name four junction points on the route between these cities.

(3) Name the railroad or railroads that form the shortest route between: Eau Claire, Wis., and Elroy, Wis.; Ashland, Wis., and Portage, Wis.; Green Bay, Wis., and Winona, Minn.

(4) Name the terminal points, the junction points between them, and the connecting railroads at each of these points on the Duluth & Northern Minnesota.

(5) Name the railroad or railroads that form the shortest route between Helena, Mont., and Superior, Wis.; name four junction points between these cities, on the required railway route, and name one connecting railroad at each junction point.

(6) Name the railroad or railroads that form the shortest route between Manitowoc, Wis., and St. Paul, Minn.; name four junction points on the route between these cities.

(7) Name the railroad or railroads that form the shortest route between: Sioux Falls, S. Dak., and Shakopee, Minn.; Ortonville, Minn., and Glencoe, Minn.; Brainerd, Minn., and Bemidji, Minn.; Lakota, N. Dak., and Minot, N. Dak.

(8) Name two railroads that enter: Ypsilanti, Mich.; Belle Fourche, S. Dak.; Centralia, Wis.; Fargo, N. Dak.

(9) Name the railroad or railroads that form the shortest route between Minot, N. Dak., and Austin, Minn.; name four junction points between these cities, on the required railway route, and name one connecting railroad at each junction point.

(10) Name the railroad or railroads that form the shortest route between Sheboygan, Wis., and Duluth, Minn.; name four junction points on the route between these cities.

(11) Name the railroad or railroads that form the shortest route between: Devils Lake, N. Dak., and Starkweather, N. Dak.; Bismarck, N. Dak., and Washburn, Wis.; Aberdeen, S. Dak., and Yankton, S. Dak.; Redfield, S. Dak., and Parker, S. Dak.

(12) Name the terminal points, the junction points between them, and the connecting railroads at each of these points on the Kalamazoo, Lake Shore, & Chicago.

(13) Name the railroad or railroads that form the shortest route between Pierre, S. Dak., and Milwaukee, Wis.; name four junction points between these cities, on the required railway route, and name one connecting railroad at each junction point.

(14) Name the railroad or railroads that form the shortest route between Chicago, Ill., and Marquette, Mich.; name four junction points on the route between these cities.

(15) Name the railroad or railroads that form the shortest route between: Canton, S. Dak., and Chamberlain, S. Dak.; Escanaba, Mich., and Ishpeming, Mich.; St. Ignace, Mich., and Calumet, Mich.; Lewistown, Mont., and Lombard, Mont.

(16) Name two railroads that enter: Waukesha, Wis.; Allegan, Mich.; Terry, Mont.; Rapid City, S. Dak.

TRANSPORTATION
(ELEVENTH DIVISION)
